It's my pleasure to present you a estimate regarding the work to move the two tank's we did inspect at Sløvåg the 11 June.

I have worked out a detailed plan regarding all costs for executing the moving of tank A & B to the foundation in position "Tank 4 & Tank 3". The estimate include all equipment which will be necessary to move the tank's in a secure way. It also include both my work and one truck with a 72 t/m crane to assist in moving all utility equipment. The work execute by Skailand Kranservice will be insured from any accident. To maintain coverage from the insurance company, the prepared plan must be followed at all time.

Any elements of uncertainty will be object for stopping the work, until all uncertain factors are made clear. Skailand Kranservice by my self, Kenneth Skailand, will be responsible for all decisions that will have to be made during all operations. Before the skidding of the tanks starts, the area will be prepared by the employer. This include any required ground work and also cut out in the foundation. Considerable reinforcements that will be necessary if the "Cut out" is skipped, or the tanks do not hold required qualifications, will be execute at a normal cost-rate as extra. Skailand Kranservice also disclaim responsibility for any damages that have source in conditions that may not be controlled by Skailand Kranservice.

This estimate is based on the facts that Skailand Kranservice will be 100% responsible for the work that is included in the agreement. A specified agreement regarding any details must be work out before any work is set in progress. The details regarding the complete job and also the payment terms, we may then enter into a contract.

The estimate included the already executed inspection is NOK 576.000.- ex.vat.

I hope you will find this offer of interest, and look forward to hear from you again.

Flekkefjord 19 June 2008

Best regards, Kenneth Skailand
